

Reversal Learning Read Me

Make sure your file is in the proper format and named appropriately (GlobalID_sumdata.txt, where “Global ID” is exactly the same as the Global ID listed in Access).

Make sure the top line of your file reads “SUMMARY DATA FOR SUBJECT GLOBAL ID – REVERSAL LEARNING” where “Global ID” is exactly the same as the Global ID listed in Access. (Make sure there is a space before and after the Global ID.) *Note*: If you enter only the Global ID under “Enter a subject ID” when you start RevLearn, you will not need to alter this in the .txt file! =)
