

ADULTS NEEDED FOR FETAL ALCOHOL SPECTRUM DISORDER (FASD) MOBILE HEALTH APP FEASIBILITY TRIAL

Are you 18 years or older and been diagnosed with FASD or known prenatal alcohol exposure? You may qualify for this study.

University of Rochester's researchers are partnering with the Adult Leadership Collaborative of the FASD Changemakers to develop a new app for adults with FASD. This app provides resources, tools, and information to improve physical health and quality of life for adults with FASD or known prenatal alcohol exposure.

Participate in a feasibility study to try the app to give feedback on how well it works and receive monetary compensation.
